EDUCATION

Massachusetts Institute of Technology (MIT), PhD student in EECS, MIT CSAIL

2021 - 2025

UC Berkeley, BA Computer Science (EECS Honor Class), Applied Math, with distinction

2017-2021

My research centers on generative world model and associated decision-making algorithms. My background bridges autoregressive video models, model-based RL via inference, and robotics. During my PhD, I published a focused set of works across these areas, each of which has been well recognized within its respective research community.
